Annual Report on Hate Crime Statistics

HATE CRIME STATISTICS

1994

Uniform Crime Reports

FOREWORD

Adhering to guidelines established by the "Hate Crime Statistics Act of 1990" the FBI defines a crime motivated by racial, religious, ethnic, or sexual-orientation bias as a hate crime. Bias-motivated crime, or hate crime, is not new to humankind, nor is it unique to America. America, however, stands among the forerunners in the effort to identify the extent and nature of hate crime incidents.

Whenever an individual or groups of individuals exert power over others because of a perceived bias towards them, hate crime occurs. Therefore, the very nature of the crime makes it difficult to combat. The law enforcement community, however, recognizes that collecting valid information concerning the occurrence of these crimes is requisite to addressing them. And, as nationwide interest in hate crime incidents expands, increasing numbers of local, state, and federal law enforcement agencies are demonstrating commitment to collecting hate crime data.

The collection process would not be possible without the courageous efforts of victims and witnesses in reporting these crimes. Still many hate crimes remain unreported. The statistics in this publication cannot portray the anxiety caused to victim and community or measure the full extent of the problem, yet they do represent a collaborative effort between law enforcement and the community which provides an avenue for developing strategies to combat this societal evil.

INTRODUCTION

In response to the passage of the Hate Crime Statistics Act of 1990, the Attorney General designated the FBI's Uniform Crime Reporting (UCR) Program to develop a data collection system for its more than 16,000 voluntary law enforcement agency participants. With the cooperation and assistance of several local and state law enforcement agencies already experienced in the investigation of hate crimes and the collection of related information, comprehensive guidelines for the compilation of hate crime data were established.

Collection Design

The data collection effort is designed to capture information about the type of bias serving as the motivating factor, the nature of the offense, and the characteristics of victims and offenders. When developing this reporting program, many issues were considered. For example, it was recognized that hate crimes are not separate, distinct offenses, but rather traditional crimes motivated by the offender's bias. An offender may, for example, commit an assault because of his/her bias against the victim's religion, race, ethnicity, or sexual orientation. It was, therefore, not necessary to create new crime categories. To the contrary, hate crime data could be collected by collecting additional information about crime already being reported to UCR. Additionally, the bias motivations reported would be those specifically addressed by the enabling Act, i.e., prejudice against a race, religion, sexual orientation, or ethnic group. Because of the difficulty of ascertaining an offender's subjective motivation in the commission of a crime, bias would be reported only after a law enforcement investigation revealed sufficient objective information that the offender's actions were motivated, in whole or in part, by bias.

The Hate Crime Statistics Program has been endorsed by the International Association of Chiefs of Police, the National Sheriffs' Association, the UCR Data Providers' Advisory Policy Board, the International Association of Directors of Law Enforcement Standards and Training, and the Association of State Uniform Crime Reporting Programs. These endorsements were crucial to the successful implementation of the program, for without law enforcement's voluntary data collection and support, any effort would be futile.

Training

With the development of the hate crime data collection program, various UCR staff members have conducted 61 training conferences nationwide. During these seminars, law enforcement personnel were apprised of the standard methodology used in the investigation and reporting of hate crime. Conference attendees, representing all 50 states and the District of Columbia, totaled 1,199 separate city, county, state, and federal agencies. Included among them were trainees serving populations over 100,000, which represented approximately 79 percent of the United States' population. Also attending were personnel from state-level UCR Programs, subsequently, returning to conduct training for their respective agencies.

Program Plans

The FBI plans to continue to publish an annual report on bias-motivated criminal behavior, along with other topical studies highlighting unique aspects of hate crime. Although the Hate Crime Statistics Act mandates data collection for 5 years, the FBI considers the collection of hate crime statistics to be a permanent addition to the UCR Program.

Participation

In 1994, the FBI received data submissions from approximately 7,400 law enforcement agencies in 43 states and the District of Columbia. The number of agencies reporting within each state is shown in Section II of this publication. (See Table 13.) Reports from these agencies, while not sufficient to allow valid national or regional measures of the volume and types of crimes motivated by hate, offer perspectives on the general nature of hate crime occurrences.

The collection of hate crime statistics at the national level will increase awareness and understanding of the problem, and in turn, will result in its mitigation. This effort will enable law enforcement agencies to better quantify their resource needs and allocate them to the areas where they are most essential. Historically, law enforcement has demonstrated progressive, professional competence in approaching criminal problems. Its response to the hate crime legislation is no exception, and participating law enforcement agencies are to be commended for their efforts in addressing this issue. This report identifies the agency that serves as the state-level UCR state program administrator

in 44 states, the District of Columbia, and U.S. Territories within the United States. (See Appendix.) Individual law enforcement agencies in these states submit their crime reports to the FBI through their respective state agencies. A few states have not as yet instituted the collection of hate crime data. The FBI supports those states which have devised realistic plans for reporting hate crimes. In states where no plans exist, the FBI continues to work directly with individual law enforcement agencies as it does in the six states not having a state-level UCR Program. A majority of non-participating law enforcement agencies and states have cited government budgetary constraints and/or lack of personnel resources as reasons for not participating. It should be noted that estimated startup times are somewhat longer for those states planning to incorporate hate crime data into their National Incident-Based Reporting Systems (NIBRS) than for states collecting data under the current summary system. The FBI believes that the amount of detailed and reliable data which will be available through NIBRS will more than compensate for the short-term delay.

METHODOLOGY

Presented throughout this publication are tables and narrative comments addressing the volume and type of bias-motivated criminal incidents reported to the FBI during 1994. Criminal incidents can involve more than one offense, victim, or offender. For counting purposes, one offense is counted for each victim of a "crime against person." One offense is counted for each distinct operation of "crime against property," regardless of the number of victims. The total number of victims in a given incident is the sum of victims associated with each offense that took place within the incident.

In Section I of this publication are statistics on reported criminal incidents that evidenced bias motivation. Included in the data collection are the offenses of murder and nonnegligent manslaughter; forcible rape; robbery; aggravated assault; burglary; larceny-theft; motor vehicle theft; arson; simple assault; intimidation; and destruction/damage/vandalism of property. The bias categories, as listed in the Hate Crime Statistics Act, are race, religion, ethnicity/national origin, and sexual orientation.

Notification of hate crime incidents is received by the FBI's Uniform Crime Reporting (UCR) Program from city, county, and state law enforcement agencies through various types of media ranging from paper reporting forms to floppy disks and magnetic tapes. Individual reports are submitted for each hate crime incident coming to the attention of law enforcement agencies participating in the UCR Program. Quarterly reports are used to advise that no hate crimes occurred within the reporting jurisdiction. Reports are sent through state-level UCR Programs (see Appendix) or directly to the FBI from agencies in states without Programs or whose state Programs have not begun collection.

Data for 1994 were supplied by 7,356 law enforcement agencies representing over 152 million United States inhabitants or approximately 58 percent of the Nation's population. The following table shows the number of agencies represented within each population group and the extent of population coverage.

Number of Agencies by Population Group, 1994

Population Group	Number of Participating Agencies	Population Covered
Group I (Cities 250,000 and over)	45	34,666,345
Group II (Cities 100,000 - 249,999)	78	11,467,941
Group III (Cities 50,000 - 99,999)	201	13,758,876
Group IV (Cities 25,000 - 49,999)	392	13,423,147
Group V (Cities 10,000 - 24,999)	993	15,535,379
Group VI ¹ (Cities under 10,000)	3,821	13,669,861
Suburban Counties ²	641	35,897,481
Rural Counties ²	1,185	13,859,758
Total	7,356	152,278,788

¹Includes universities and colleges to which no population is attributed.

²Includes state police agencies to which no population is attributed.

Section I contains tables showing data for 7,356 agencies supplying all the information required for tabulation. The total number of hate crime incidents reported to the FBI in 1994 was 5,932. (See Table 1.)

Section II contains tables showing participation levels by state and counts of hate crime

incidents reported by individual law enforcement agencies across the country. Caution should be exercised in attempting direct comparisons of hate crime totals among agencies due to the many variables affecting the volume and type of crime from place to place.

SECTION I

Hate Crime Statistics, 1994

During 1994, 5,932 bias-motivated criminal incidents were reported to the FBI by approximately 7,400 law enforcement agencies in 43 states and the District of Columbia. Sixty percent of the incidents were motivated by racial bias; 18 percent by religious bias; 12 percent by sexual-orientation bias; and the remainder by ethnicity/national origin bias.

The 5,932 incidents involved 7,262 separate offenses, 7,498 victims, and 6,265 known offenders. Most of the incidents (88 percent) involved only one victim and a single offense type (97 percent). Only 35 percent, however, involved one victim and one offender.

Offenses

Crimes against persons composed 72 percent of the 7,262 offenses reported. Intimidation was the single most frequently reported hate crime among all offenses measured, accounting for 39 percent of the total. Following were damage/destruction/vandalism of property, 24 percent; simple assault, 18 percent; and aggravated assault, 14 percent. (See Table 3.)

Thirteen persons were murdered in hate-motivated incidents. Racial bias and sexual-orientation bias each motivated the highest number of murders in 1994: 5. (See Table 4.) Anti-hispanic offenses accounted for 3 of the 13 homicides.

Victims

Eighty-two percent of the 7,498 reported hate crime victims were individuals, while the remaining 18 percent were businesses, religious organizations, or varied other targets.

Of the 7,498 victims in 1994, 69 percent were targets of crimes against persons. Six of every 10 victims were attacked because of their race, with bias against blacks accounting for 37 percent of the total. (See Table 1.) Only crimes motivated by religious bias showed a higher percentage of crimes against property rather than persons. (See Table 4.) Sixty-five percent of incidents involving victims targeted because of their religion involved crimes against property.

Offenders

Law enforcement agencies reported 6,265 known offenders to be associated with the 5,932 incidents recorded in 1994. Fifty-seven percent of the known offenders were white, and 30 percent were black. (See Table 11.)

Offenders were unknown for 2,357 or 40 percent of the incidents. Eighty-four percent of the known offenders were reported in connection with assaults (aggravated and simple assault and intimidation). In crimes against persons, victims or witnesses are frequently able to assist with the identification of offenders.

Considering the types of racial bias involved, 5 of every 10 white offenders were identified in connection with anti-black incidents. Seven of every 10 black offenders identified were associated with anti-white incidents. Law enforcement agencies were least likely to be able to identify offenders of religious bias crimes. In 1994, only 415 offenders were identified in connection with 1,062 incidents. (See Table 1.) In most cases where religious bias was the motivating factor, the offenses were crimes against property for which clearance rates are historically lower.

Locations

Twenty-seven percent of hate crime incidents in 1994 occurred in residences. Following closely were highways, roads, alleys, or streets

accounting for 21 percent. The remaining incidents were widely distributed among varied locations. (See Table 2.)

SECTION II

Jurisdictional Hate Crime Statistics, 1994

Nearly 7,400 law enforcement agencies covering about 58 percent of the Nation's population or over 152 million inhabitants supplied information for inclusion in this publication. The number of reporting agencies by state, along with their corresponding population coverage, is shown in Table 12. Also indicated is the number of agencies recording hate crimes during 1994, as well as those reporting no occurrences within their jurisdictions. Hate crime occurrences were recorded by 16 percent of the participating agencies, while the remainder reported that no bias crimes were brought to their attention.

The individual jurisdictional figures are presented in six tables delineating city, suburban county, rural

county, university/college, state law enforcement agencies, and other agencies. To be included in these statistics, law enforcement agencies must have submitted data for at least one quarter of calendar year 1994. The figures, therefore, do not represent complete 12-month totals for every agency listed. Due to the many factors affecting the nature and volume of crime, care must be exercised in making any comparisons among agencies, even where agencies reported for comparable timeframes. All factors must be considered before valid comparisons can be achieved.

Table 12. - Agency Hate Crime Reporting by State, 1994
